

FDOT CADD Software – Alpha Release FDOT Open Roads Designer Workspace

Greetings,

FDOT Production Support Office | CADD is pleased to announce the release of the FDOT Open Roads Designer workspace for “alpha testing” with Bentley Open Roads Designer Connect Edition (10.03.00.43). This is an alpha release, and the software is for testing purposes only.

NON-PRODUCTION ALPHA TESTING SOFTWARE

The FDOT Open Roads Designer workspace is provided with no warranty and must not be used for production work on FDOT projects.

Downloading and installing this software constitutes understanding and agreeing to these terms and NOT using the software for production work on FDOT projects. There are forward and backward compatibility issues between Select Series 4 and Open Roads Designer DGN files; do not attempt to use these files between platforms.

INSTALLATION LOCATION

This software is not installed in a typical FDOT installation folder, but is instead installed in a folder created in ProgramData for Bentley Open Roads Designer. (C:\ProgramData\Bentley\OpenRoads Designer CE\Configuration). This alpha release is a standalone “Workstation Only” install and we have not yet created a client/server installation options.

TRAINING INFORMATION

If you are not familiar with Open Roads Designer or the Microstation Connect environment, we highly recommend you follow the Bentley Learn training videos on this topic before attempting to use this software.

TESTING, BUGS, AND ENHANCEMENT SUGGESTIONS

While we will not currently be able to provide support or training for this alpha release software, the CADD Office sincerely appreciates your help in testing this, and we are very interested in your feedback and suggestions. Please report any bugs or potential enhancement suggestions on the FDOT configuration to cadd.support@dot.state.fl.us or via our Issue Log support portal <https://fdotservicedesk.dot.state.fl.us/CherwellPortal/FDOTServiceDesk>.
